

\$TDF

Web3 Onboarding Guide

This guide helps you to set up a web3 wallet, connect to the TDF platform and acquire/interact with the \$TDF token.

Set Up A Web3 Wallet

WHAT IS A WEB3 WALLET?

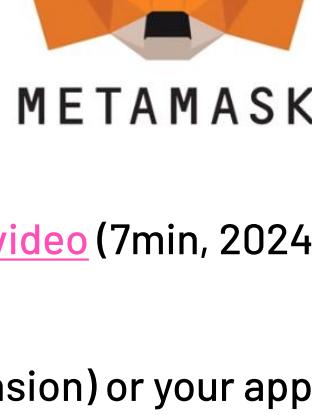

A web3 wallet is a digital “wallet” to store and access digital currencies such as Bitcoin, Ethereum and \$TDF, as well as NFTs. It is your personal key to interact with the crypto world.

WHY DO I NEED WEB3 WALLET?

You need a web3 wallet to buy, hold, and book your stay with \$TDF tokens. Just like you need a wallet with cash to buy stuff in the physical world. You also need a web3 wallet to participate in TDF’s governance.

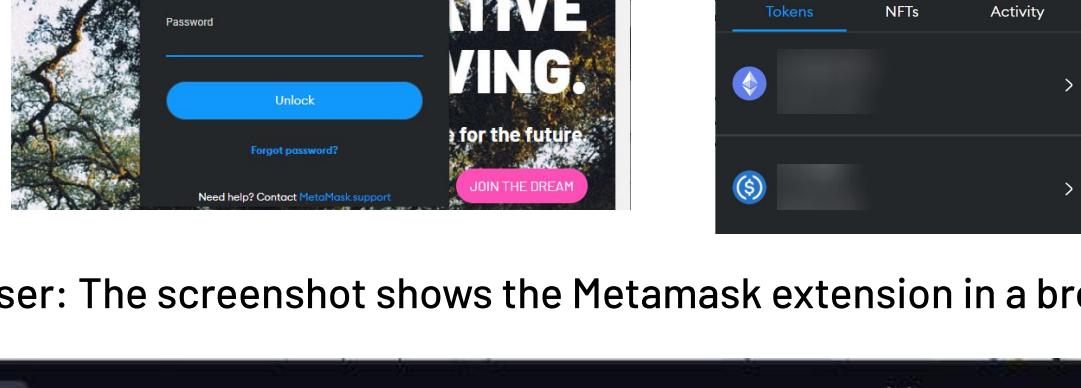

HOW TO GET A WEB3 WALLET

As web3 wallet provider, we recommend Metamask. Metamask is free, open-source and widely used. You can get your Metamask wallet as an app on your Android and iOS smartphone or tablet, as well as a browser extension (Chrome, Firefox, Brave or Edge) on your laptop.

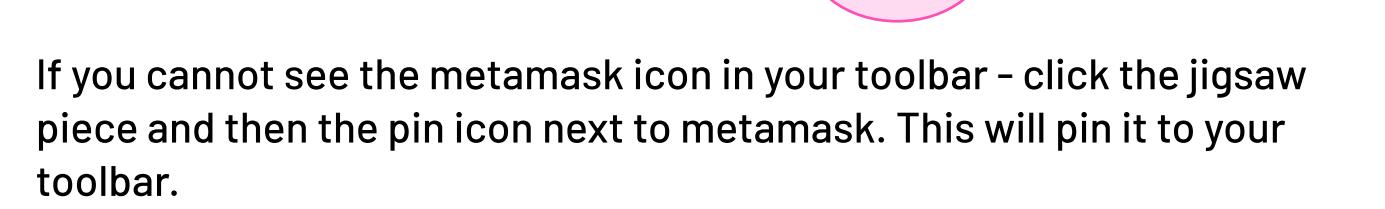

Follow the steps below and/or watch [this tutorial video](#) (7min, 2024).

1. Go to <https://metamask.io/> (for browser extension) or your app store (for phone/tablet app) and click download. **⚠️ Do not use any other URL - there are many scam websites out there! ⚠️**
2. Browser: If it asks to read and modify websites you visit, accept. This is normal.
3. Create an account and choose a password to log into your wallet.
4. You will be shown a 12-word Secret Backup Phrase (aka Seed Phrase). Write it down somewhere safe, e.g. offline! **⚠️ This is your one and only time to see this! If you lose it, you will be locked out of your account forever and all your crypto assets are lost. NEVER disclose it to anyone! Not even Metamask support. ⚠️**
5. Confirm your 12-word Secret Backup Phrase by writing it into the boxes provided.
6. **Done!** Once you log in with your password (not the seed phrase) you should automatically be connected to the Ethereum network.

Browser: The screenshot shows the Metamask extension in a browser.

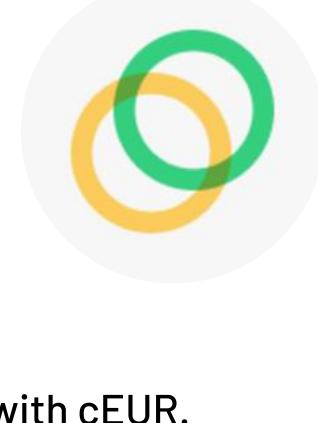

If you cannot see the metamask icon in your toolbar - click the jigsaw piece and then the pin icon next to metamask. This will pin it to your toolbar.

Buying \$CELO And \$CEUR

WHY BUY \$CELO & \$CEUR?

Currently you are only able to purchase \$TDF tokens with cEUR.

You will also need some \$CELO which will be used to pay for transaction fees when purchasing \$TDF. These fees go to the blockchain validators, not TDF, and are essential for the sale transaction to go through.

HOW MUCH \$CELO & \$CEUR DO I NEED?

\$CELO - As the Celo network is very cheap, you will only need a small amount, maximum gas fees at the time of writing are around 0.0008 \$CELO. Depending on where you choose to buy it, you will probably be forced to buy a minimum amount, like 5 \$CELO for example. That is more than enough for all the transactions you'll make in the coming years.

\$cEUR - This depends on the amount of \$TDF you would like to purchase. We recommend you experiment on the [\\$TDF token calculator](#) to find out how much you will need to get to cover your \$TDF token purchase.

HOW TO GET \$CELO & \$CEUR - FROM FIAT (EUROS)

Option 1:

Follow the steps below or watch [this video](#).

1. Visit <https://ramp.network/buy>
2. Under "you get" click the dropdown menu and type in, and select CELO or cEUR. You can also change which currency you want to pay in

The left screenshot shows the Ramp interface. In the 'YOU PAY' section, '300' is entered and 'EUR' is selected. In the 'YOU GET' section, '0.0104' is shown with 'BTC' selected. Below these sections, it says '1 BTC ≈ 28419.19 EUR'. At the bottom, there's a note '300 EUR is all you pay, fees included' and a 'Details' link. A green button at the bottom right says 'PROCEED • TOTAL €300.00' with a right-pointing arrow. The right screenshot shows a 'Select Asset' modal with a search bar containing 'celo'. Below the search bar, it says 'Available now:'. There is a list of assets: 'CELO' (with a yellow circle icon), 'Celo Euro CEUR' (with a green circle icon), 'Celo Brazilian Real CREAL' (with a blue circle icon), 'Celo Dollar CUSD' (with a green circle icon), 'Decentraland on Ethereum MANA' (with a red circle icon), and 'Decentraland on Polygon' (with a red circle icon). The 'CELO' option is highlighted with a pink oval.

3. Type in the desired amount you want to purchase and click "proceed"
4. Enter and confirm your email address
5. Enter your wallet address - this is where you will receive your tokens upon successful payment. You can find this at the top of your Metamask. Simply click it to copy it.

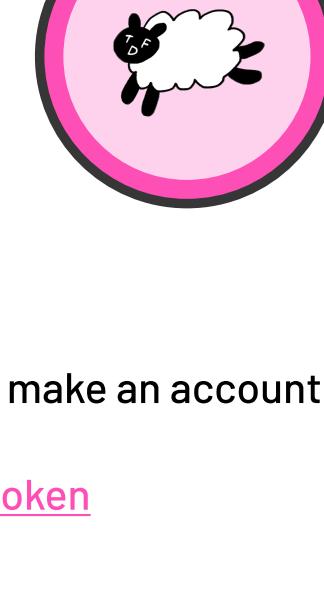

The screenshot shows the Metamask mobile application. At the top, it says 'Celo (Mainnet)' with a dropdown arrow. Below that, it says 'Not connected' with a red exclamation mark. In the center, it shows '0 CELO' and '\$0.00 USD'. Below this, there are four circular buttons with icons: a plus sign for 'Buy', an upward arrow for 'Send', a double-headed arrow for 'Swap', and a circular arrow for 'Bridge'. At the bottom, there are three tabs: 'Tokens' (which is selected and has a blue underline), 'NFTs', and 'Activity'. Under the 'Tokens' tab, there are two items: '0 CELO \$0.00 USD' and '0 TDF'.

6. Fill out your KYC (Know Your Customer) and verify your identity. This is legally required to be collected by the service provider; contains your name, address, ID etc. DONT BE ALARMED, THIS IS NORMAL.
7. Pay with your preferred payment method.
8. Done! Your tokens should be visible in your Metamask wallet

HOW TO GET \$CELO & \$CEUR BY CONVERTING CRYPTO

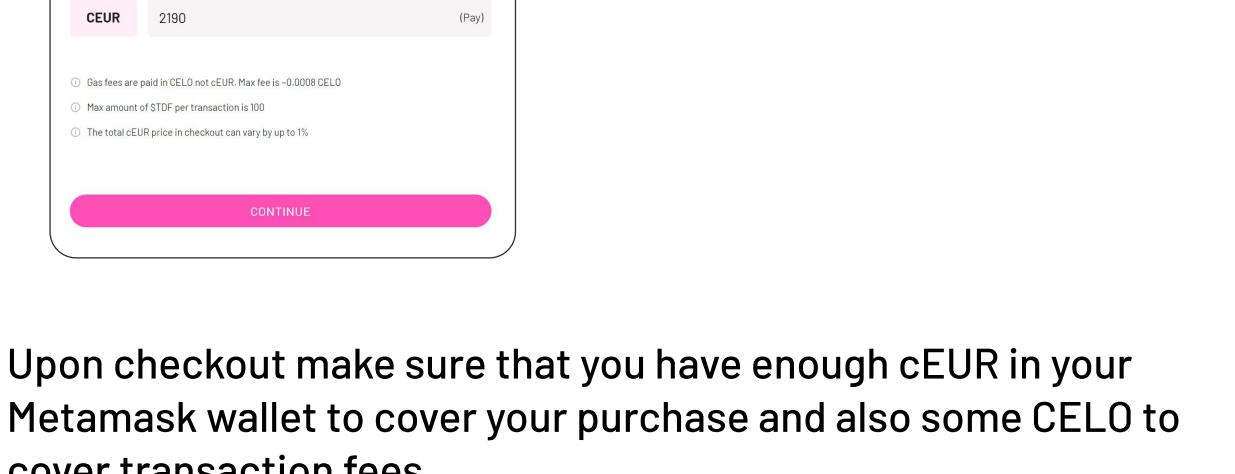

- You can convert ETH, BTC or any other crypto to cEUR or CELO
- Use the officially supported decentralized exchange:
 - <https://v2.app.squidrouter.com/>

Buying \$TDF

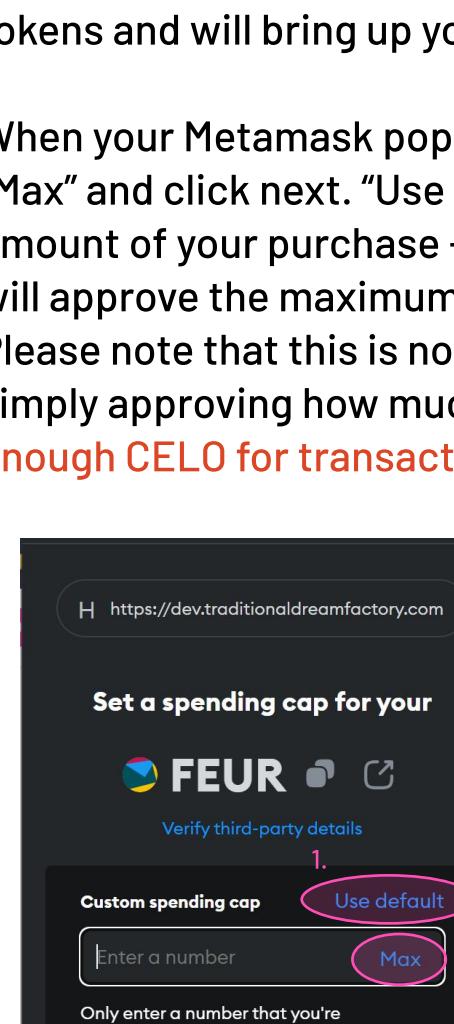

HOW TO BUY \$TDF

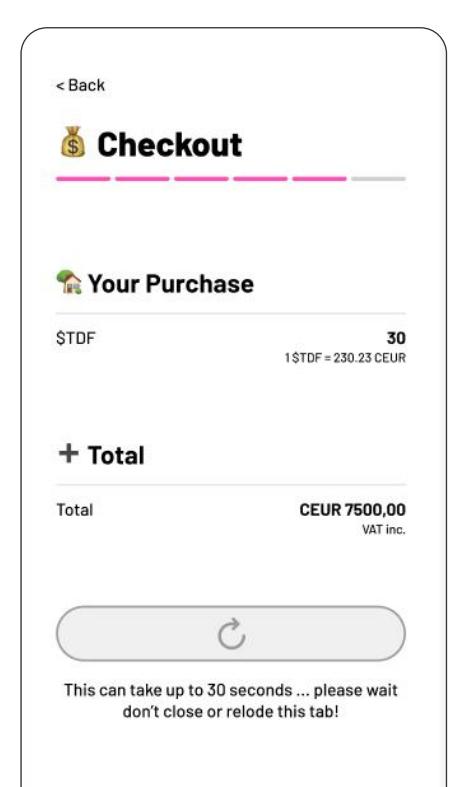

1. If you have not done so already, visit <https://www.traditionaldreamfactory.com/> and sign in or make an account.
2. Visit <https://www.traditionaldreamfactory.com/token>
3. Click "Buy TDF"
4. Make sure you have completed the checklist and connect your wallet to your account. You will only be able to continue once your wallet is connected and you are on the right network (CELO). You will get a notification to switch if you are connected to a different network. If all is correct you should be able to see your "wallet balance" and be able to continue.

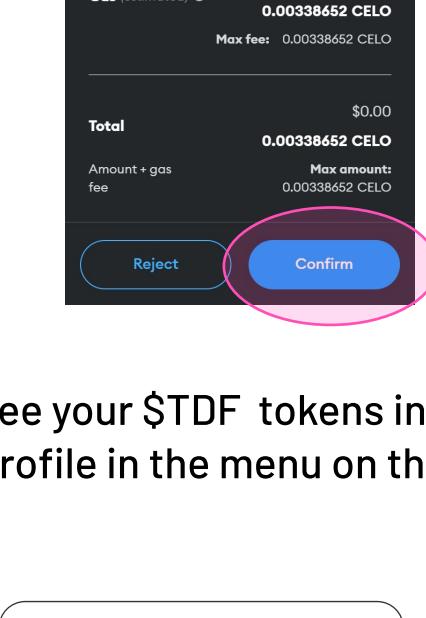

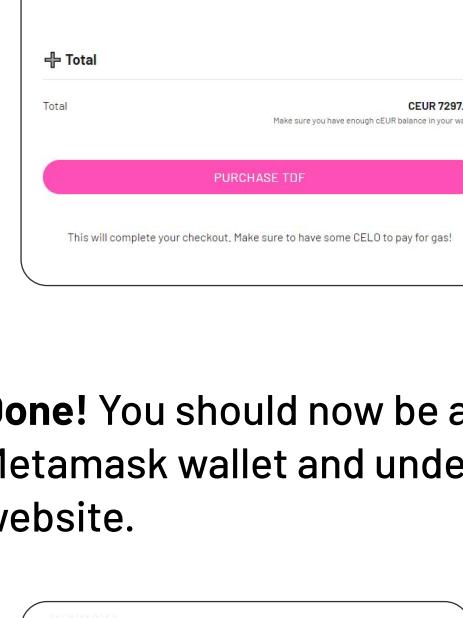

5. Fill in your nationality. **⚠️ Unfortunately we are not able to process Swiss or US nationals at this moment ⚠️**
6. Use the token calculator or fill in your desired amount of \$TDF you would like to purchase. You will then see how many cEUR you will need to complete the transaction.

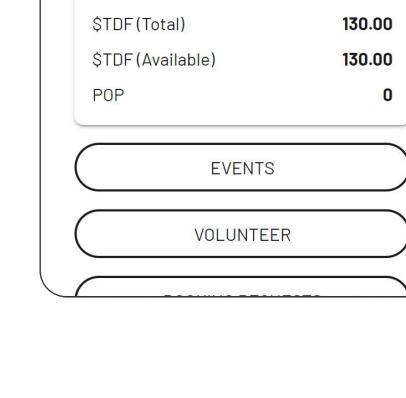

7. Upon checkout make sure that you have enough cEUR in your Metamask wallet to cover your purchase and also some CELO to cover transaction fees.

8. Click Approve cEUR. This will approve the spending of your cEUR tokens and will bring up your Metamask.
9. When your Metamask pops up, you can select either "use default" or "Max" and click next. "Use default" will approve the Total cEUR amount of your purchase + 5% (to accommodate for slippage). "Max" will approve the maximum cEUR you currently hold in your wallet. Please note that this is not the amount you will be charged - it is simply approving how much you can spend. **⚠️ Make sure you have enough CELO for transaction fees ⚠️**

10. Wait until approval is successful. This can take up to 30 seconds - do not close or reload the page!

11. After this is completed successfully, click "purchase TDF" and confirm the transaction on Metamask **⚠️ Make sure you have enough CELO for transaction fees ⚠️**

12. Done! You should now be able to see your \$TDF tokens in your Metamask wallet and under your profile in the menu on the TDF website.
