

A photograph of a man and a woman sitting together on a colorful, patterned blanket. The man, on the left, has curly hair, wears glasses, and a light-colored sweater. The woman, on the right, has long hair and a white shirt. They are both smiling. In the background, there are some screens and a window.

7. Looking Ahead

A photograph of a rural landscape. In the foreground, there's a large pile of straw or dry grass. In the middle ground, a white house with a tiled roof is visible, and a person is working near it. There are green fields, trees, and a small tent-like structure in the background under a blue sky with clouds.

Aljoscha: Market Garden

RESIDENCIES

Raising Happy Chicken And Producing Healthy Compost

We've introduced 8 new chicken to our farm. They've been busy digging up our compost piles, eating maggots, picking the spontaneously growing pumpkins - and mainly they are procuring us daily with half a dozen eggs.

Agroforestry Experiments

Our reforestation project has seen 2000+ trees root in and are feeling at home.

Our food forest has expanded with over 500 trees thriving.

We've added a miniforest, a spiral garden, patio garden & more.

Learnings From Our Market Garden

FEEDING SOILS & MOUTHS

Developing Our First Water Retention Lake

Our first lake is establishing itself over this winter. This lake enables us to store captured rain water no only from our roofs & patio (~900m³+ per year), but also runoff water from our entire 5ha under management.

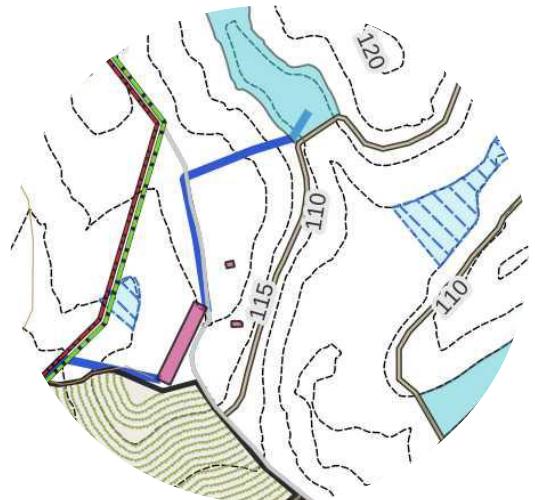

Building Rain Harvesting Swales (Or Ditches)

A big part of harvesting rainwater in the 5Ha is two swale-ditches, that divert runoff towards the lake and biopool and are a great place to plant more trees and bushes.

Developing The Master Plan For The Future

Water is the first thing you plan for when making a holistic plan, especially while preparing for resilience in the face of erratic climate and possible drought. The master plan is coming along bringing all the elements together for a regenerative playground.

PLANTING THE RAIN

2. BUILD

Luca Continues To
Lead Our Build
Projects ✨

Our Professional Build Team Has Been Busy

We started some major works this year which meant hiring a professional contractor and welcoming a big team of workers to the site. They have been working hard everyday progressing the first phase of construction.

**Mars: Build & Meta
RESIDENCIES**

Our Bio Pool Is Ready To Fill Up!

The vision is coming to reality and it's been amazing to watch the process of constructing the bio pool. Now the foundations are laid we need to plant and wait for the winter rain. We can't wait for our first dip next year!

The Water Temple

Luca has been working on this visionary design combining a deck flooring with a water therapy pool. The original artwork by Ivan has been preserved and sealed and later we will add an arched roof. Imagine sitting in a hot pool watching a movie under the stars!

Coming soon !

Our Nursery Cafe Is Going To Flourish

The nursery cafe has a new roof and will be filled with plants and good vibes. We have hired an admin & hospitality assistant who will start in the new year to help us run a this little cafe and support local connections.

PREPARING FOR THE HEAT

The Team House Gets A Whole New Feel

The small house has been fully refurbished and insulated, including a new top beam, roof and windows. We are building a rocket stove to keep warm and making bedrooms and communal space for the team and residents.

A Family Yurt

Luca & Judith are moving into a yurt on the land, which will also become a kid friendly space for the families at TDF whilst we continue construction. It's been fun and new to have kids at TDF and to see how we can build spaces for families here.

HOME IMPROVEMENTS

3. SPACE & KITCHEN

Luna Became Our Official Space Host

Guest Experience

Luna has been working with our stewards and closer to streamline our guest and volunteer experiences. By creating facilitated journeys for the volunteers we have supported the building of friendships and connections.

Dgin Has Remained Our Emotional Support Coach

Glamping Upgrade

The bell tents sure needed some TLC, so we glammed them up and made them much more cosy. They are also getting taken down and professionally cleaned up for next season so we can start things feeling fresh!

Food From The Heart

Food continues to be at the heart of our community as we aim to eat from the land and garden. This year we have had a number of guest chefs and kitchen wizards in a kitchen bringing culinary delights!

Sharing & Caring

Keeping rituals alive such as weekly sharing circles, women and men circles and getting to know each other through workshops has supported conscious relating and community wellbeing.

FAIRY MAGIC

471 bookings

2417 nights booked

568 new accounts

A FLOW OF VISITORS

00:41:21

4. META

Julia Joined Our Team As Our Content Creator

She will work remotely over the winter and we look forward to seeing her again in the spring!

Investor Pitching

This year we successfully brought in €360k+ investment required so that we could apply for the European grant that can fund the whole construction. The application is under review and we could hear any time now!

Spreading The Word

TDF continues to attract people from all over the world. Through our social media, blogging, website development, events and word of mouth our community is growing. We have had some amazing photography, film and digital growth people supporting us this year. Thank you for all the creativity and recording.

RESIDENCIES

Platform updates

via Closer

- Residency & build project pages
- Automatic refunds
- More detailed financial data
- Admin Dashboard page
- 5 Communities deployed, several tokens under consideration
- Google login
- Configurable platform settings
- Affiliate Dashboard (wip)
- Airdrop page & first airdrop
- Accounting integration
- Check in & checkout flow
- Proof of Presence token
- Bed & room assignment
- Food options
- Multi calendar view
- AI assistant upgrades
- (and much much more) ...

The image displays three circular screenshots of the Closer platform interface:

- Dashboard:** Shows booking statistics. It includes a pie chart indicating 10.7% Booked (280), 342 Pending, and 342 Paid. Other metrics shown are 2204 Nights and a list of available listings: Van Parking Spa, Shared Glamping, Private Glamping, Camping, Volunteer dorm, Small glamping tent, and a partially visible "Small glamping tent".
- Booking calendar:** A multi-calendar view showing bookings for various staff accommodation beds from Thursday to Sunday. The beds are color-coded in pink. A legend indicates "Only show listings with bookings".
- MUSHROOM FARM and EVENTS HALL:** Two project pages. The Mushroom Farm page lists requirements: a mycologist, setup of a mushroom farm, and production. It shows a reward of \$TDF 16.00, a budget of €10.000.00, and an estimate of 4 months. The Events Hall page lists requirements: skilled builders for a hall/main stage/dancefloor area. It shows a reward of \$TDF 12.00, a budget of €10.000.00, and an estimate of 3 months.

A photograph capturing a lively outdoor meal or community gathering. In the foreground, a person's hands are raised in a traditional Mayan hand gesture, known as a 'chi' or offering. They are positioned above a table laden with various dishes, including a large metal bowl filled with a colorful vegetable stew, a stack of tortillas, and a plate of sliced fruit like melon and banana. Behind the hands, a large silver pot sits on a stove, and several jars of jam or honey are visible. The background features a white building with a solar panel on its roof and a tiled-roof house under a clear blue sky. A bright pink tinsel garland hangs across the scene.

5. STEWARDSHIP PROGRAM

Meet Cat - Our Gentle Yogi And Mental Health Advocate

Cat arrived at TDF in the spring and then decided to join us in the fall as a steward. She brought so much to the space with her playfulness, creative initiative and leadership.

Meet August - Our Animal Loving Meta Crisis Trickster

August joined our stewardship with eagerness and curiosity. Always there to remind us to breath and shake. He warmed the hearts of our team and visitors with his excellent hosting, always sprinkled with silliness.

This season we launched our first educational stewardship program over 12 weeks, introducing our stewards to different topics each week and giving them space to develop their own content. They learnt many skills of village building, from web3 to permaculture, construction and hosting events. The season was packed with new learnings and exploration.

Steward Highlights

1. Meta upgrades with the TDF Game Guide & Kitchen Guide
2. Co hosting big events like the art faire & the PDC
3. Keeping up rituals and exciting workshops for our team and visitors

Residencies

A photograph of a group of people gathered outdoors, possibly at a community event or garden party. In the foreground, a young plant with large, green, serrated leaves is in sharp focus. The background is blurred, showing several people from behind, engaged in conversation or activities. A person with long, curly hair is visible on the left, and a person in an orange shirt is in the center. The setting appears to be a sunny day in a garden or park.

PARTNERSHIPS

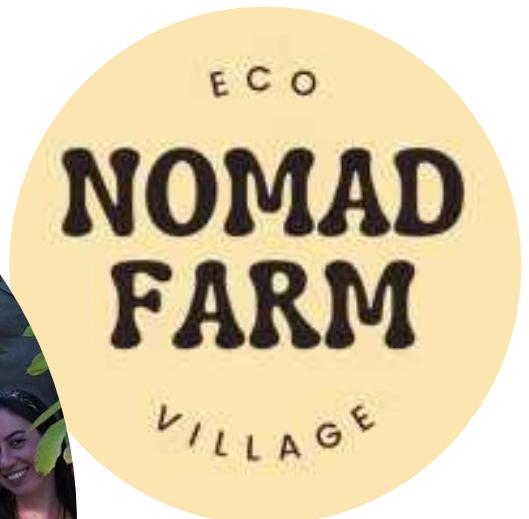

NOMAD FARM

Is an ecosystem at the intersection of digital nomadism and regenerative living.
Offering experiences at ecovillages and regenerative farms for location independent folks who seek to explore a lifestyle closer to Nature with access to remote working amenities.

They held a one month long retreat at TDF of the Spring inviting participants to fully emerge in regenerative living whilst maintaining their online work days.

It was huge success and we can't wait to host them again!

MILESTONES

"As creatives we constantly generate ideas.

Having mere proposals is adding an information load to the others. Taking action on those proposals, forming teams, creating an MVP, and pushing for the factoring of those ideas is what we stand for and want to see at TDF."

Pink Paper

Priority

1. Opening up and freshening up the space after winter
2. Irrigation & Land care
3. Raising funds for construction & grant applications
4. Growing Community

Total Visitors

94 Guests

37 Volunteers

81 Event Attendees

35 Members

Completed Milestones

Land

- We built the first lake
- Started replanting the garden
- Welcomed new land stewards - Mica & Ofer
- Planted spiral garden
- Planted the mini forest
- New chicken coop
- Toilet upgrades

Build

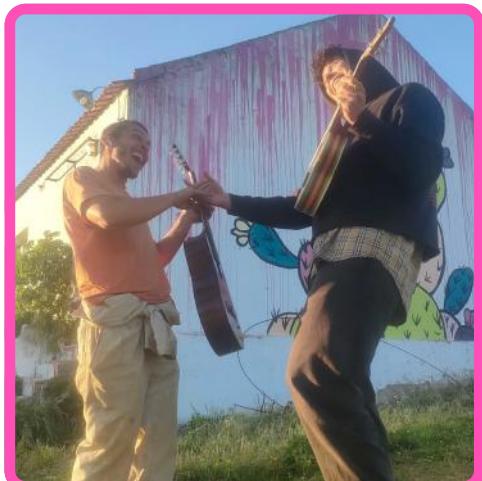

- Temple deck
- Started Bio Pool excavation
- Built the new bar with sink
- Kitchen upgrades: boiler, food disposal, new stove & tables
- Indoor shower

Space

- Reopening TDF and making it liveable - glamping tents upgrade
- New space host - Luna
- Hosted Nomad Farm & multiple events

Meta

- Raised funds for grant application
- Developed Closer
- Gitcoin grants & Let's Grow Radio host

FALL CYCLE

Priority

1. Growing community through events
2. Starting construction of bio pool, house & cafe
3. Replanting garden & reforestation care

Total Visitors

147 Guests (+819%)

22 Volunteers

37 Event Attendees

26 Members

Completed Milestones

Land

- Replanted whole market garden
- Finished swales and ditches
- Planted 500 more trees
- Upgraded compost system & chickens
- Upgraded dry toilet & worm farm

Build

- Temple deck & pool
- Bio pool completed and ready to plant
- Team house renovation

Space

- Workshop clean up
- Hosted PDC
- Updated volunteer flow
- Glamping care & cleaning
- Hosted the most guests & volunteers on record

Meta

- Token sales
- Developed closer & onboarded other projects
- TDF game guide
- Social media growth - Our instagram grew 18% - 1008 new followers

TEAM ROADMAPS FOR '25

Land

1. Finalising master plan
2. Food Production For 30 people by summer
3. Acquiring the land and expanding our activity
4. Water Systems: rainwater, grey water improvements, irrigation, storage
5. Mushroom farm
6. Expanding the chicken coop to include free-range areas
7. Planting actions for windbreaks, visual breaks and introducing bushes
8. Making new pathways

Community & Space

1. Seasonal events throughout build
2. Engagement of TDF community Online/Offline
3. Members annual gathering
4. Build residents & volunteer focus
5. Glamping reset

Meta

1. Attracting New Members
2. Branding - Maturing the brand and communication
3. Token sales to new members
4. Social Media - Building following and engagement
5. TDF Swag

Build

1. Finish team house
2. Temple pool & roof
3. Mushroom Farm structure
4. Events space self build
5. Stage one construction on co-living
6. Sauna roof
7. Treehouses
8. Silo Houses

TDF 2050

The year is 2050. In the midst of the global desert landscapes, a new civilization is flourishing. This civilization embraced a Sacred Economy for over 20 years, and is inexorably restoring the planet's soils, water cycles and biodiversity. Growing biodiverse and native forests, settlements achieved to recreate natural biotic pumps, similar to those seen in the Amazon in the pre-internet era. The civilization is a deeply nested and overlapping network of collaboration frameworks distributing resources to optimize and preserve Nature's design. Resources are produced in the network by agents that create true ecological benefits. Its citizens spend no currency on living amenities since they benefit from the abundance of resources in their commons. This frees up their time to focus on what truly matters to them, and what truly creates value for their beloved commons.

This is built upon the internet of value (web3). In 2030, the regenaissance decade ends - and a natural economy is booming. The global financial system evolves from an extractive to a regenerative one. Decentralized organizations around the world accelerate their impact by embracing a system-thinking approach to economics. Natural assets are sought after as central banks and decentralized protocol treasuries recognize them as the value backing the economy, rewarding stewards building capacity for regeneration in the process. Resources, critical knowledge and human creativity flow towards the optimization of the commons.

With the aspiration of building a regenerative way of life OASA turned its eyes on Portugal and established its first regenerative prototype - Traditional Dream Factory (aka TDF) in 2021. TDF is the first blueprint in developing a new form of living that is more in tune with nature and with human creativity.
